DECLARATION BY STUDENT

To.

The Director.

SVIMS, Koregaon Park, Pune.

I undersigned hereby declare that this project titled, "**Online Wedding Planning**" written and submitted by me to **SPPU, Pune**, in partial fulfilment of the requirement of the award of the degree of **MASTER OF COMPUTER APPLICATION (MCA-1)** under the guidance of **Dr. Shveti Chandan**, is my original work.

I further declare that to the best of my knowledge and belief, this project has not been submitted to this or any other University or Institution for the award of any Degree.

Place: Pune

Date:

(Suvarna D. Pote)

ACKNOWLEDGMENT

I extend my sincere gratitude to **Dr. B.H.Nanwani, Dr. Neeta Raskar and Dr. Shveti Chandan** for allowing me to carry out the study and for their constant encouragement, valuable suggestions and guidance during the research work.

I extend my special thanks to **Ms. Samiksha Yeola** for their kind co-operation and inspiration.

I extend my special gratitude to my dearest family members and friends who encouraged and motivated me to complete the project report.

Place: Pune

Date :5/12/2024

Your Name and Signature

CHAPTER-1 INTRODUCTION

1.1 Client /Organization Profile:

- **Client Name :** Edso Services
- **Location :** India,Pune
- **About Organization :**

Edso Services is a leading IT solutions provider dedicated to delivering innovative and reliable IT services that empower businesses in their digital transformation journey. Specializing in custom software development, cloud computing, IT consulting, and Training, Edso Services offers comprehensive solutions tailored to meet the unique needs of each client.

1.2 Need for System:

online wedding planning can provide many benefits, both for couples organizing their wedding and for service providers in the wedding industry. Here are some key needs and reasons why an online wedding planning system is highly useful:

1. Centralized Information Hub

- **Problem:** Wedding planning involves many moving parts, including vendors, guest lists, venues, budgets, schedules, etc. Managing all this information across multiple platforms can lead to confusion and missed details.
- **Solution:** A centralized system consolidates all relevant details into one platform, allowing easy access to wedding plans, documents, contracts, and communication between all parties involved.

2. BUDGET TRACKING AND MANAGEMENT

- **Problem:** Sticking to a wedding budget can be overwhelming without proper tools to track spending.
- **Solution:** A budgeting tool in the system can help track wedding expenses, set and adjust budget limits, and notify users when they're close to exceeding their budget.

3. GUEST LIST MANAGEMENT AND INVITATIONS

- **Problem:** Managing guest lists, sending invites, tracking RSVPs, and meal preferences can be cumbersome.
- **Solution:** An online wedding planning system can allow easy creation and management of guest lists, digital invitations, and automated RSVP tracking. It can also offer integration with social media for easy guest outreach.

4. VENDOR DISCOVERY AND MANAGEMENT

- **Problem:** Finding reliable wedding vendors and coordinating with them can take a lot of time and effort.

- **Solution:** The system can feature a directory of vetted vendors (e.g., photographers, florists, caterers) with reviews, ratings, and contact information. Couples can search, compare, and book vendors directly through the platform.

5. TASK AND TIMELINE MANAGEMENT

- **Problem:** Weddings require managing many tasks, from booking the venue to creating seating charts. It's easy to forget important deadlines.
- **Solution:** The system can offer a customizable checklist and timeline to keep the couple on track. It can also send reminders for upcoming tasks and deadlines.

1.3 SCOPE AND FEASIBILITY OF ONLINE WEDDING PLANNING:

1. Scope of Online Wedding Planning System:

The scope of an online wedding planning system encompasses various functionalities and services that can help couples plan their weddings efficiently, collaborate with vendors, manage budgets, track timelines, and communicate with their wedding party and guests. The core scope of such a system can be divided into several key features:

KEY FEATURES IN THE SCOPE:

Vendor Management: An online platform can allow couples to discover, compare, and book wedding vendors (e.g., photographers, caterers, florists, DJs, venues) based on reviews, ratings, services, and pricing.

Budget Management: A tool to set and track wedding expenses, ensuring couples stay within budget. This includes tracking deposits, payments, and remaining balances.

Guest List Management: The system can store guest details, manage invitations, track RSVPs, and allow guests to select meal choices or other preferences.

Task Management and Timelines: A customization wedding checklist and timeline to help couples stay on top of wedding planning tasks (venue booking, attire selection, rehearsal dinner, etc.).

Collaborative Planning: A shared platform where couples can collaborate with their wedding party (bridesmaids, groomsmen) and family, delegating tasks, communicating, and sharing updates.

Event Schedule: A detailed timeline of the event, including ceremony and reception schedules, vendor arrivals, and key moments (first dance, cake cutting, etc.).

Wedding Website Creation: The system can allow couples to create personalized wedding websites that contain essential information (RSVPs, travel details, gift registries, etc.).

Mobile Compatibility: The system should be mobile-friendly so users can access their wedding plans on-the-go and stay updated while away from home.

Integration with Social Media: Allow couples to share their wedding journey, photos, and updates through integrated social media platforms.

Gift Registry Integration: Couples can add products from multiple stores into one wedding registry, which guests can access and purchase items from.

1.4 Operating Environment

Hardware and Software requirement :

System specification divided into two categories. You must have certain software and hardware installed on your computer. The minimum system specifications include.

➤ HARDWARE SPECIFICATION

1) RAM : 4.00 GB

2)HARD DISK : 16 GB

➤ SOFTWARE SPECIFICATION

1)Operating System : Windows 10

2)Front End: VISUAL STUDIO Version- 1.95.3,HTML ,CSS .

3)Back End : PHP

4)REPORT : PHP

5)PHP MYSQL SERVER

1.5 Technology Used : HTML :

HTML(Hypertext Markup Language): HTML is the standard markup language used to create structure of web pages. It defines elements such as headings, paragraphs, links, and images, allowing for the organization and presentation of content on the web.

CSS :CSS is used to style HTML elements, controlling the visual appearance of web pages. It enables the customization of colors, fonts, spacing, and layout, ensuring a consistent and aesthetically pleasing design across the site.

PHP :PHP is a server-side scripting language used for building dynamic web applications. It allows for the generation of dynamic content, processing of form data, interaction with databases, and implementation of server-side logic.

CHAPTER 2: PROPOSED SYSTEM

2.1 Proposed System:

PROPOSED SYSTEM FOR ONLINE WEDDING PLANNING

To create an effective online wedding planning system, the platform should focus on providing a comprehensive set of tools and services that streamline the entire wedding planning process. Below is an outline for the design and features of such a system, focusing on user experience, vendor integration, and collaboration among all parties involved.

2.2 Objective of Project

OBJECTIVES OF THE ONLINE WEDDING PLANNING SYSTEM

The objective of an **Online Wedding Planning System** is to streamline and simplify the entire wedding planning process for couples, vendors, and event planners, ensuring an organized, stress-free experience. Below are the primary objectives of such a system:

1. CENTRALIZED MANAGEMENT OF WEDDING PLANNING

- **Objective:** Provide a single platform for couples to manage all aspects of their wedding planning, from budgeting and vendor coordination to guest lists and scheduling.
- **Outcome:** This minimizes confusion and ensures that all information is in one place, making the planning process more efficient and organized.

2. SIMPLIFY VENDOR DISCOVERY AND MANAGEMENT

- **Objective:** Help couples find, compare, and hire wedding vendors (e.g., florists, photographers, caterers, venues) based on ratings, services, and budgets.
- **Outcome:** Couples can easily discover trusted vendors and make bookings directly, streamlining the vendor selection process.

3. BUDGET MANAGEMENT AND TRACKING

- **Objective:** Provide couples with a tool to create, manage, and track their wedding budget, ensuring that they can control costs and prevent overspending.
- **Outcome:** Couples can set a budget, track expenses in real-time, and receive alerts if they're close to exceeding their budget.

4. STREAMLINED GUEST LIST AND RSVP MANAGEMENT

- **Objective:** Allow couples to efficiently manage their guest list, send invitations, track RSVPs, and handle meal preferences or special requests.
- **Outcome:** This reduces the effort involved in managing guest-related tasks and ensures that all invitations and responses are tracked accurately.

2.3 User Requirement :

Although the system is a simple one, man who manages this organization is able to understand simple computer processes is needed to run the system.

The organizer will be the person who enters the data needed in to the system. Thus system will be understandable to person who handles all the organization.

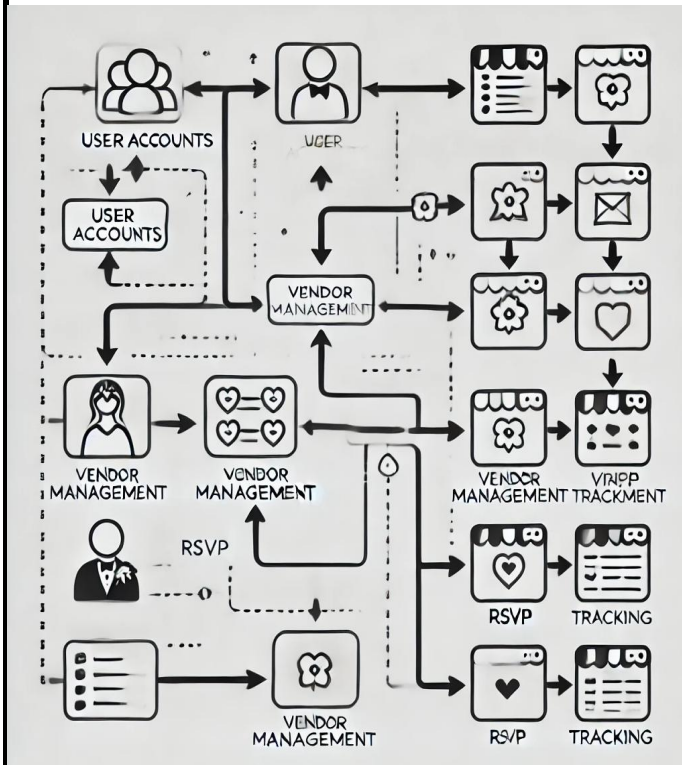

The system also needs php SQL Server/Xamp for the organizations database management system.

Different information is entered into the database such as information about the what customer requirment and what he want to changes etc..

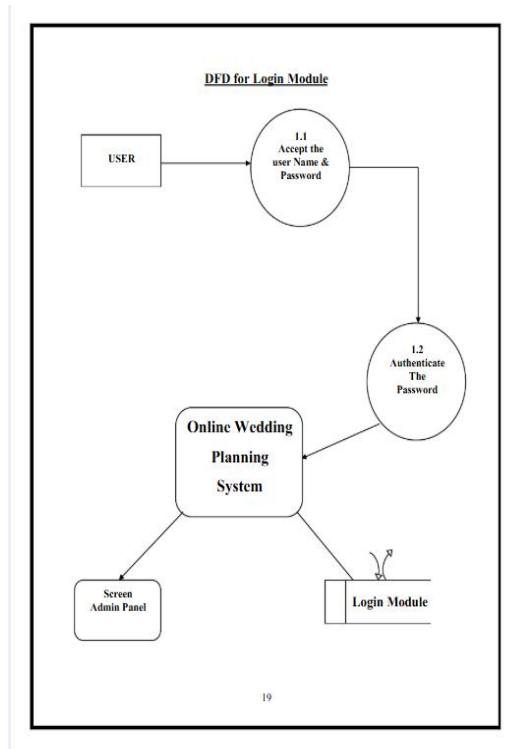

The admin has respective accounts with password that enables him to enter in the system

4.2 Future Enhancement :

1.PERNOAL FEATURE

- **AI-Powered Recommendations:** Use AI to suggest vendors, themes, or venues based on user preferences, budget, and location.
 - **Customized Planning Templates:** Allow users to create personalized planning checklists and timelines.
 - **Guest Experience Customization:** Offer tools for creating personalized invitations, seating charts, and gift registries.
-

2. ADVANCED PLANNING TOOLS

- **Budget Calculator:** Include a dynamic budget tracker that adjusts automatically based on added expenses or vendor quotes.
 - **Real-Time Collaboration:** Enable couples to collaborate with family, friends, or planners through shared dashboards and task assignments.
 - **Vendor Management Portal:** Provide tools for booking, comparing, and reviewing vendors directly within the platform.
-

3. INTERACTIVE FEATURES

- **Virtual Venue Tours:** Integrate 360-degree venue tours or augmented reality (AR) features for virtual walk-through.
 - **Interactive Mood Boards:** Allow users to drag and drop images to create and share inspiration boards.
 - **Live Chat with Vendors:** Provide instant communication options to connect users with service providers.
-

4. INTEGRATION AND AUTOMATION

- **Calendar Syncing:** Integrate with Google Calendar or Outlook to sync wedding dates and deadlines.
 - **Automated Reminders:** Send reminders for key milestones like payments, RSVP deadlines, and meetings.
 - **E-Contracts and Payments:** Facilitate digital contracts and secure payment options directly through the platform.
-

5. Social and Community Features

- **Community Forums:** Add discussion boards where users can exchange ideas, seek advice, and share experiences.

- **Social Media Integration:** Allow users to share updates, inspiration boards, or live-stream events.
- **Wedding Website Builder:** Provide customize templates for users to create personal wedding websites for sharing event details.

6. MOBILE APP ENHANCEMENTS

- **Offline Access:** Ensure that key features work without an internet connection.
- **Push Notifications:** Send updates, reminders, and notifications about progress or vendor communications.
- **Quick Vendor Lookup:** Use glocalization to suggest local vendors and venues.

7. ECO-FRIENDLY OPTIONS

- **Sustainability Tracker:** Help users choose eco-friendly vendors or track their carbon footprint.
- **Digital Invitations and RSVP s:** Promote paperless invitations with creative digital options.
- **Recycling and Donation Services:** Integrate post-event services for donating leftover food or decor.

8. ADVANCED ANALYTICAL

- **Guest RSVP Insights:** Provide analytic on guest RSVP s, dietary preferences, or gift choices.
- **Vendor Performance Metrics:** Share ratings, reviews, and performance insights for service providers.
- **Budget Trends:** Offer insights on how other users allocated budgets for similar weddings.

9. EMERGING TECHNOLOGIES

- **AI Chat-bots:** Implement AI chat-bots for answering user queries and providing 24/7 support.
- **Block-chain for Payments:** Use block-chain for secure and transparent vendor payments and contract management.
- **Meta-verse Weddings:** Offer tools for planning virtual weddings in the meta-verse.

10. POST-WEDDING SERVICES

- **Photo and Video Management:** Provide a platform for sharing and storing event photos and videos.
- **Review System:** Allow couples to leave feedback for vendors and venues.
